# In What Environment Does Your Forklift Operate?

- ✓ Ramp Loading & Unloading
- ✓ “On-the-go” Shifting
- ✓ Abrasive
- ✓ Corrosive
- ✓ Humid
- ✓ Dirty & Dusty
- ✓ Short Shuttle
- ✓ Extreme Temperature

With Doosan’s Oil Cooled Disc Brake system there are no more worries about tough work environments shortening the life of the brakes!

Doosan Industrial Vehicle Corp.  
W. E. Johnson Equipment Co.

## Sealed System

The Doosan ODB system is completely enclosed and sealed from outside contaminants protecting the inner workings of the brake system.

## Heat Resistant

Extreme heat and high humidity will not affect the Doosan ODB system. Heat generated during braking is transferred from the discs and plates directly to the transmission/differential oil.

Doosan Industrial Vehicle Corp.

## Braking Surface

With 500 square inches of braking surface, the Doosan OBD-equipped forklift has 5 times the stopping surface of conventional shoe brakes.

## Maintenance-Free

With a Doosan OBD system there is never any required brake adjustment or spring or linkage replacement, EVER. Brake jobs are history with only periodic oil change required.

# Repair Cost Estimator Worksheet

Repair or Maintenance	Competitor's Shoe brake Costs	Doosan's Disc Brake Costs	W. E. Johnson's Brake Costs
Service Call	\$100	\$0	
Parts cost (excluding drums)	\$310	\$0	
6 hours of labor at \$105 per hour	\$630	\$0	
<b>Total brake job cost</b>	<b>\$1,215</b>	<b>\$0</b>	
Average number of brake jobs in 5 years	X3	None	
<i>Projected expenses</i>	<i>\$3,645</i>	<i>\$0</i>	
<b>Additional Brake Maintenance</b>			
Drum parts, springs, hold-downs, etc.	\$1,580	\$0	
<b>Total Expenses Over 5 Years</b>	<b>\$5,225</b>	<b>\$0</b>	

Typical shoe brake problems like glazing, grabbing, pulsating pedal, low pedal, Park brake adjustments and still braking can cost well over \$5,000 in repairs during the life of a forklift. These problems and costs are non-existent with an OBD system-equipped Doosan forklift.

*\*The ODB system comes standard on most Doosan models.*
